

# RATED #1 IN CANADA

## BEST PERFORMANCE

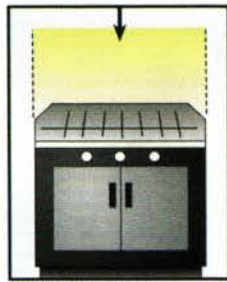

Range Guard is the best Commercial Kitchen Fire Suppression System that can protect you from loss of property and life. There is only one "best", **Range Guard**.

**First With The Best**

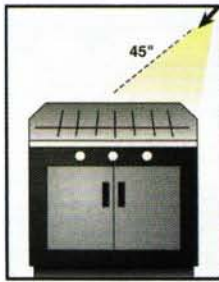

### Performance Proven First Wet Chemical System

- Range Guard, uses KARBALLOY, the superior wet chemical agent first developed 37 years ago. Range Guard was the FIRST, and remains the BEST!
- ULC Approved

Theirs

Nozzle must be within appliance perimeter

Ours

Some nozzles can be outside appliance perimeter if desired

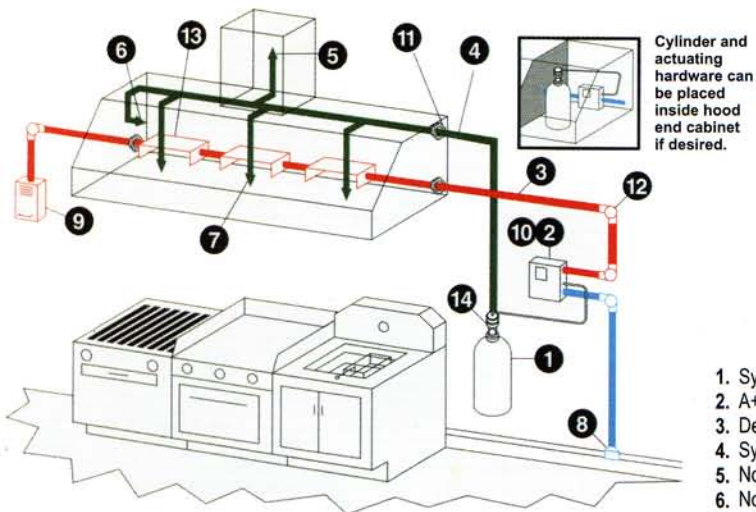

### Unmatched Coverage

- Rapid fire detection with state of the art heat detectors
- Removal of heat source as Range Guard system automatically turns off appliances
- Immediate fire suppression as wet chemical agent is sprayed on hazard area with special nozzles designed to give optimal coverage; wet agent provides superior spanofication, which quickly snuffs flames and prevents reflash
- Quick, easy clean up once appliances have cooled, the agent can be easily wiped away from equipment

## BEST VALUE

### Easy and Affordable to Install & Maintain

- Maximum protection with minimum maintenance
- More cost effective because flexible, versatile system components save on hardware and installation costs
- Recharging is fast & economical; great for keeping maintenance costs low
- Nozzles can be placed outside the appliance perimeter for ease of installation

1. System Cylinder with Mounting Bracket
2. A+ Control head or Mechanical Control Head
3. Detection Line Enclosed in Conduit
4. System Discharge Piping
